

## Free Webinar Training !

### Installation & Maintenance of Mechanical Seals

This webinar is designed to teach the basic types of mechanical seals and how to install them for the longest possible service life. You will view installation of both component and cartridge type mechanical seals. Wrench in-hand, the instructor will show tips and techniques used by the experts. The instructor will be providing interactive questions during the webinar for the students. Students will also be able to ask questions during the webinar.

**Thursday, December 10, 2020 from 11am-12pm**

Geiger is famous for our hands-on training. Tools, gloves, safety glasses, real pumps, real seals, real-life learning. Due to the ongoing COVID-19 pandemic, Geiger will be turning to webinars to bring you our well-known training classes.

Our first training: **Installation and Maintenance of Mechanical Seals** will still have the real hands-on class feel but will be brought to you through a participatory webinar run by our Sales Engineer, Alan Greve.

The Webinar will be appropriate for anyone who wants to learn more about installing and maintaining Mechanical Seals.

You will be able to earn 1 hour of continuing education credit for your PE or PA DEP Operators License. (Operator Credit Pending)

#### Schedule:

10:55AM - Sign-In

11:00AM - Online Training Begins

11:55AM - End of Seminar\*

\*Those attending for credit will be given a quiz.
